

Aquarius Condominium Association

Beautification Committee Recommendations:
June 12, 2017

Glass Railings for Balconies:

The lightest grey possible is recommended for the glass railings. The supports for the railings should be the same white finish that already exists on the west pool deck using minimum supports needed so as to provide as clear a view as possible from each balcony.

Balcony Surface Finish and Color:

The balcony color to be in a light grey similar to the paint on the floor of the valet deck on the west end. We opt to keep the original surface topping as suggested by Structural with no enhanced design pattern needed for the finish. The patterns would have been an additional cost to the existing budget. It will be a savings of approximately \$74,000. for the residents of Aquarius.

Building Paint Colors:

The representative of Sherman Williams will be providing several paint color options for the residents to consider. The

main color will be white with a grey tinted accent color. These options should be available within the next few weeks for everyone to look at. The colors will be mounted on the exterior of the building so we can all get a look at them in true light.

Carole Pumpian, Chairperson Beautification Committee
